Core Services

TRANSMISSION

Our complete spectrum of construction, engineering, maintenance and upgrade services range from 69kV wood structures to 500kV lattice steel tower bundle circuits.

UNDERGROUND CABLE

Allteck's High Voltage Cable team has worked locally and abroad on transmission and distribution, underground and submarine power cable systems at voltages up to and including 500kV.

SUBSTATIONS

Our substations division provides complete turnkey packages and station upgrades for greenfield and brownfield installation of high voltage substations.

DESIGN

Allteck has significant experience in residential, commercial and industrial distribution design, having completed hundreds of design projects for a wide range of clients.

DISTRIBUTION

Allteck has worked on and installed thousands of kilometers of distribution lines since the company's inception in 1982.

ENERGIZED SERVICES

We specialize in live-line work methods for Distribution, Transmission and Substations projects. Our techniques include; insulated Hot Sticks, Rubber Gloves, Barehanding, and the LineMaster Robotic Arm™.

EMERGENCY RESTORATION

When power infrastructure is damaged due to unforeseen events or natural disasters, we quickly notice how extensively we rely on power.

ENGINEERING, PROCUREMENT & CONSTRUCTION

Allteck is redefining the turnkey process by bringing full engineering, procurement and construction (EPC) services, specialized skills and unmatched resources to the project process.

INDIGENOUS ADVANCEMENT

As a Progressive Aboriginal Relations (P.A.R.) committed member of the Canadian Council for Aboriginal Business (C.C.A.B. Bronze level), Allteck is honoured to be collaborating and partnering with First Nations on their traditional territories across Western Canada. We are actively working with more than 150 First Nation communities and have developed flexible partnership models to meet the needs of the First Nation governments and economic development corporations representing their communities.

ENVIRONMENTAL MANAGEMENT POLICY

Allteck is committed to managing its business in an environmentally sensitive manner and to including sustainability initiatives within the corporate infrastructure and in field construction.

UTILITIES

Allteck provides services through a variety of contractual arrangements from individual project developments, to strategic alliances and program management.

OIL & GAS

Oil and gas processes require large amounts of electricity, increasing the demand and load placed on existing electrical infrastructure which can often require new infrastructure be built and designed.

MINING & MINERALS

With many developments in remote locations, supplying energy to facilities in some of the most rugged and sensitive environments can present a challenge.

RENEWABLE ENERGY

From wind and solar to hydroelectric projects, Allteck helps connect these renewable energy sources to main power grids.
